

TurmiMax^{BIO}™

TurmiMax Bio™ is changing the conversation about bioavailability.

What is optimal bioavailability? Science supports the claim that a turmeric extract which delivers at least 95% curcuminoids is the minimum quality standard, but how those phytonutrients are assimilated and utilized by the body is dependent on a complex matrix of quality markers which we believe delivers optimal bioavailability for you and your customers.

We call our process **OptiBio™ Assurance** and it makes **TurmiMax Bio** your clear choice for both efficient and effective phytonutrient delivery and utilization.

TurmiMax Bio™ - Your Clear Choice

- Only **TurmiMax Bio™** offers a patented, curcuminoid-rich true 95% compound that is cultivated to USDA Organic standards, water-soluble over time, free of additives and excipients, and vertically integrated from farm-to-customer. Plus, TurmiMax Bio is sustainably sourced from our dedicated farms in South India.

Can your turmeric extract say that?

TurmiMax Bio™ is ideal for use in a broad range of formulations and product applications including:

CAPSULES

TABLETS

BEVERAGES

GUMMIES

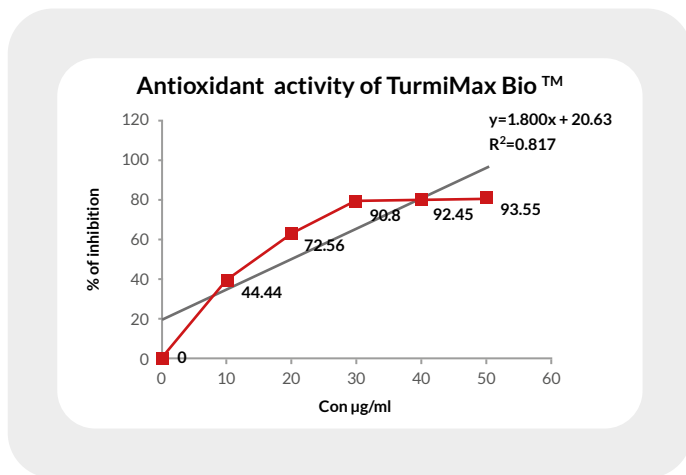

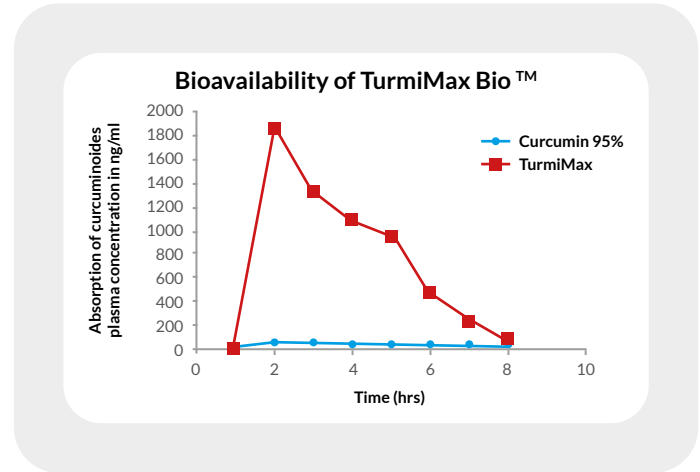

SHOTS

TurmiMax Bio™ - Your Clear Choice

Optimal Bioavailability with TurmiMax Bio™

- TurmiMax Bio demonstrates superior absorption and bioavailability compared to standard 95% curcumin.

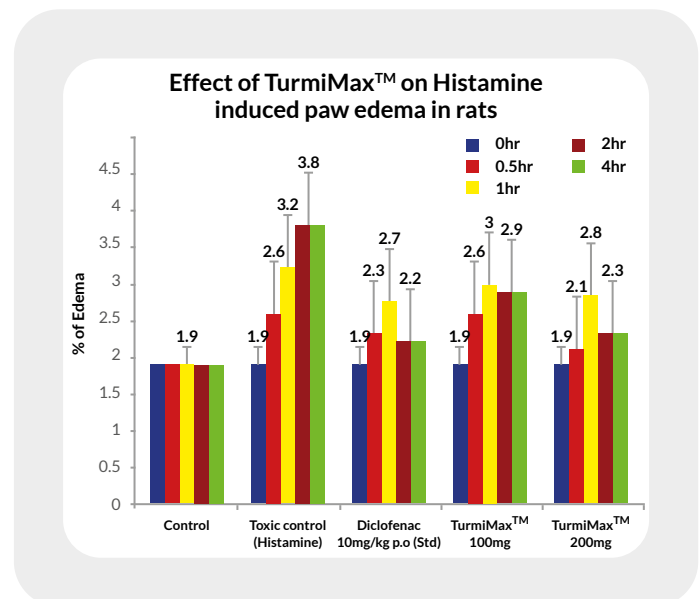

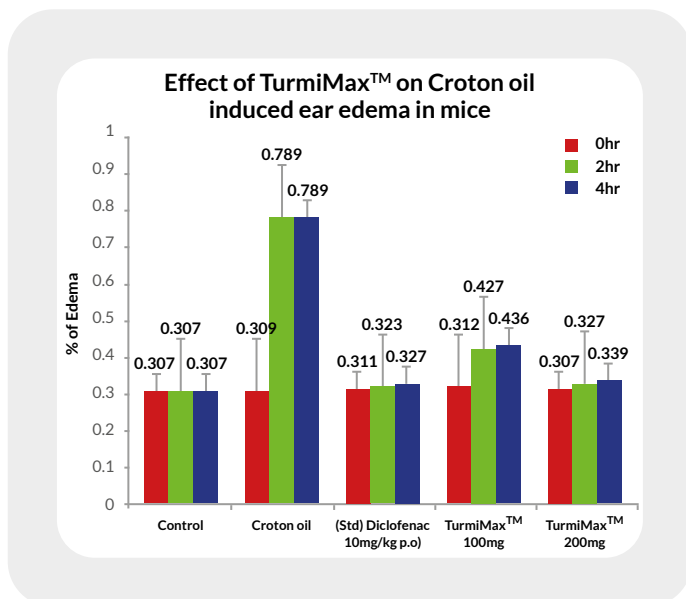

Antioxidant Power with TurmiMax Bio™

- TurmiMax Bio delivers antioxidant and cell protective activity and is a proven free radical scavenger.

Inflammation Management with TurmiMax Bio™

- TurmiMax Bio helps maintain inflammation in the normal range by inhibiting cyclooxygenase 2 (COX 2), inducible nitric oxide synthase (iNOS) and lipoxygenase (LOX), enzymes that mediate inflammatory response.

TurmiMax Bio™ - Your Clear Choice

TurmiMax Bio™ is your trusted solution when formulating products that address the common concerns of healthy aging in adults:

Product Indications

JOINT SUPPORT

DIGESTIVE HEALTH

RESPIRATORY HEALTH

CARDIOVASCULAR SUPPORT

LIVER HEALTH

MOOD SUPPORT
